

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (currently amended): ~~The~~ An electromagnetic waves shield net ~~made from the~~
comprising fibers with conductivity twisted and woven into tricot mesh whose coarseness is
below 1.5 mm, ~~comprising~~ wherein the coarseness of the mesh is maintained invariable by
controlling the movement of the length and breadth fibers of the mesh.

2. (original): The electromagnetic waves shield net described in the claim 1, wherein the
above described fiber has electricity conductivity and are twisted.

3. (currently amended): ~~The~~ An electromagnetic waves shield ~~material whose fibers with~~
~~conductivity are twisted and knitted into the electromagnetic waves shield tricot mesh and net~~
comprising conductive fibers twisted and woven into tricot mesh whose coarseness is below 1.5
mm, wherein the coarseness of the mesh is maintained invariable by controlling the movement of
the length and breadth fibers of the mesh, and said conductive fibers are pasted to the adhesive
sheet or bonding sheet.

4. (canceled)

5. (currently amended): ~~The~~ An electromagnetic waves shield material, ~~comprising the fibers with conductivity are twisted and woven into the electromagnetic waves shield mesh and net comprising conductive fibers twisted and woven into tricot mesh whose coarseness is below 1.5 mm, wherein the coarseness of the mesh is maintained invariable by controlling the movement of the length and breadth fibers of the mesh, wherein the conductive fibers are pasted to the synthetic leather woven basic cloth that is composed with the woven basic cloth and the synthetic resins surface.~~

6 – 11. (canceled)
